

Reception

- 08:30 Arrive at Pipeline Industries Guild for induction
- 08:45 Registration and morning tea and coffee.
- 09:30 The seminar will start promptly.

Introductions

David WILLIS – BSI PS 17/2 Chairman: RSK ENSR Group plc

Dave will provide a brief introduction to today's seminar and give an overview on current developments in the International, European and British Standards with respect to safety.

Gas Industry and Developments in Pipelines

Dr Jane HASWELL – IGEM, BS 17/2, UKOPA Consultant: Pipeline Integrity Engineers Ltd

Jane will cover the new edition of IGEM/TD/1 and a short history of UK developments in Pipeline Safety, dealing with the relationship of design factors and rupture, wall thickness and depth of cover and an analysis of types of pipeline failure.

10.45 to 11.00 Coffee Break

New Standards – BS EN 1461 and PD 8101-1

Paul DOCHERTY – BS 17/2 WG 1 Leader: J P Kenny Group

Paul will explain the UK reasons for their rejection of the International standards and the UK response to the imposition of the European Standard. He will explain the main safety concerns since BS EN 14161 issue and the safety benefits of using PD 8101-1.

The Pipelines Safety Regulations - Applying A Goal-Setting Regime

Alan THAYNE - HM Principal Inspector of Health & Safety, Gas and Pipelines Unit

Alan will explain the current legislation and HSE policy regarding the use of the Pipeline Standards, the HSE goal setting approach and the HSE's expectations regarding the design and modification of new pipelines in compliance with the Pipeline Safety Regulations.

12.20 to 12.50 pm - Light Buffet Lunch

UKOPA Pipeline Management and Operation

Mark HARRISON – Ex-Chairman, UKOPA: Huntsman Petrochemicals Ltd

Mark will introduce UKOPA giving some history and clarifying its main aims regarding Pipelines Safety and Pipeline Best Practice. He will follow with a brief description of the developments in UKOPA.

UKOPA Developments In Pipeline Risk Analysis and HSE Land Use Planning

Prof Rod McCONNELL – UKOPA and HSE risk consultant

Rod will provide an insight into the new developments of BSI/IGEM, UKOPA and HSE (LUP) groups in their development of risk contours and mitigation measures and an overview of the proposed part 3 addition to PD 8010 BSI British Published Document.

14.15 to 14.30 - Tea Break

UKOPA Pipeline Emergency Response Officer

John WILSON – Asset Protection and Logistics, SembCorp Utilities UK

John will talk on the new PERO Course, present an overview of the course structure and format its objectives and successes, giving the future itinerary of courses.

LINEWATCH

Dick GRAY – Pipeline Industries Guild: Esso / Linewatch

A founder member of LINEWATCH, Dick has worked through the developments and now reports on the success of the system and the hopes for its expansion throughout England.

When The Inspector Calls

Chris MOVLEY - HM Inspector of Health & Safety, Gas and Pipelines Unit

Chris will outline the current HSE expectations and requirements regarding pipeline safety and HSE inspections and audits. This is an ideal opportunity to question Chris on the do's and don'ts in pipeline safety.

Open Seminar Discussion on Pipeline Safety

Chaired by Brian SPENCER – Chair, PIG Onshore Panel: Avion Technical Services Ltd
