

Local Authorities:

National Population Database:

The National Population Database (NPD) is a series of Geographical Information Systems (GIS) datasets for England, Scotland and Wales that can be used to provide a variety of population estimates at different spatial and temporal scales.

National Population Database:

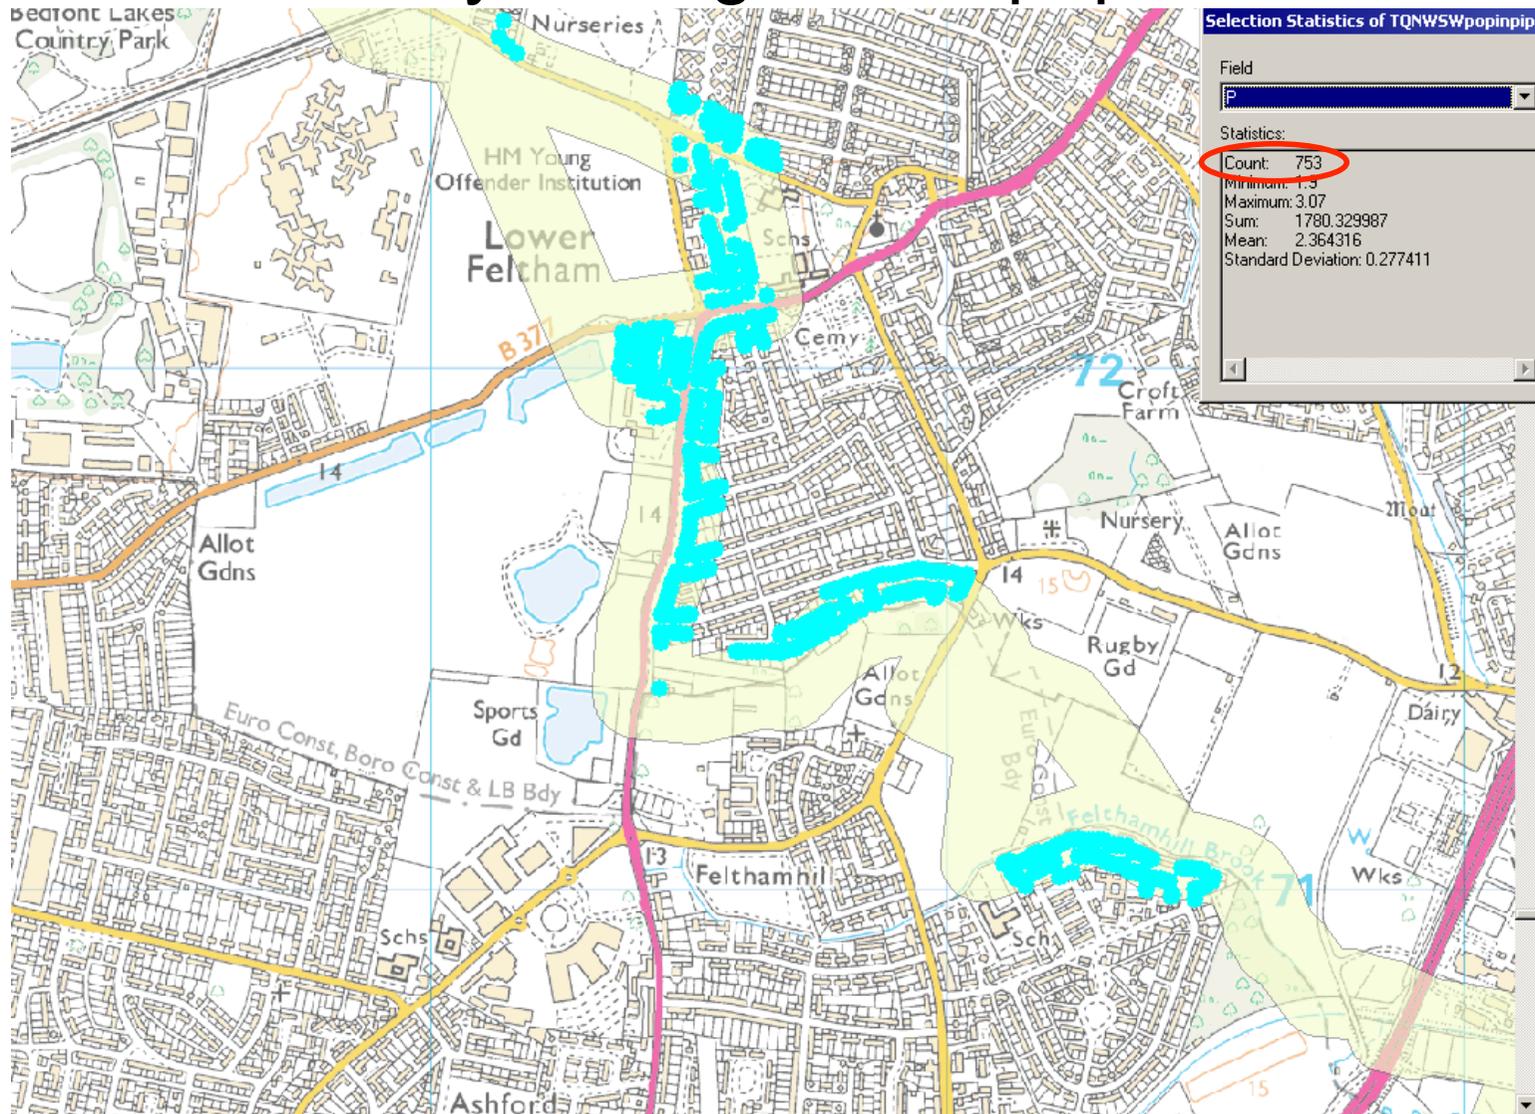

There are 6 main population subsets including:

- **Residential** (Day/Night-Time, Term/Non-Term Time)
- **Sensitive populations** (Schools, Hospitals, Care Homes, Prisons)
- **Workplace** (Based on Census Output Area)
- **Retail** (Town Centre, Out of Town Developments)
- **Transport** (Motorways, A roads)
- **Leisure** (Stadium, Theme Parks, Camping Grounds etc.)

National Population Database:

Residential Layer - Night time population ~ 753

3 Zone Maps:

- LA's have access to 3 zone maps for all major hazard sites in their area
- Map available in a number of formats - pdf and ArcGIS shape files

Pipelines:

However, there are a variety of issues to address before we can proceed with this, including:

- **Obtaining a complete set of all the major accident hazard pipelines (MAHP) routes in GIS format.**
- **Adding extra information to the pipeline route (e.g. Unique HSE Identifier, hazard buffer zone)**
- **Keeping the datasets up-to-date.**
- **How to deliver the routing and buffer zones to authorised users (e.g. local/planning authorities).**
- **Requesting permission from security services and pipeline operators.**

Data From Major Operators:

We are currently assessing data from:

- **National Grid**
- **Scotia Gas Networks**
- **SABIC**
- **Shell**

We are still waiting for data from:

- **Wales and West Utilities**
- **Northern Gas Network**

Plus some others that we haven't contacted yet.

Questions or Suggestions ?
