UKOPA

United Kingdom Onshore Pipeline Operators' Association

FDMG – Excel-based Database - Progress since February 2011

October 2011

Progress since February Meeting

- Pipeline operators have sent further data for Faults and updated Pipeline data for 2010 – now collated into data sets available for analysis

- National Grid (UKT and UKD) have confirmed that the final data download from GL in December 2011 is the completed data set, and have agreed that the GL web-based system can be dis-continued

- Data downloaded from GL is now archived for future reference

- Data collection for UK's EGIG data was collated and sent to Robert Owen in July 2011

- 2-yearly leak report draft version has been completed, and will be approved by FDMG and RAWG before issue – propose to include summary of Fault Data and Weibull parameters for External Interference predictive modelling

Future Plans

- ❑ Revise and issue 7th UKOPA Leak Report for data statistics up to and including 2010

- ❑ Audit and approve data collection, storage and processing arrangements for Excel-based database going forward

- ❑ Update database for changes during 2011 – issue new sets of pipeline and fault data to operators

- ❑ Prepare package of data and procedures for managing the database, arrangements for checking and approval of new data, and security of data

- ❑ Prepare Scope of Work for managing the database – issue Scope for tenders to suitable organisations – review proposals – by end March 2012

- ❑ Place contract for management of database starting April 2012

- ❑ GIS data from HSL
